

2017 联考英语真题 + 答案详解

注：红色标记为答案

2017 年全国硕士研究生入学统一考试管理类专业硕士学位联考**Section I Use of English**

Directions: Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET 1. (10 points)

People have speculated for centuries about a future without work, and today is no different, with academics, writers, and activists once again 1 that technology is replacing human workers. Some imagine that the coming work-free world will be defined by 2: A few wealthy people will own all the capital, and the masses will struggle in an impoverished wasteland.

A different, less paranoid, and not mutually exclusive 3 holds that the future will be a wasteland of a different sort, one 4 by purposelessness: Without jobs to give their lives 5, people will simply become lazy and depressed. 6, today's unemployed don't seem to be having a great time. One Gallup poll found that 20 percent of Americans who have been unemployed for at least a year report having depression, double the rate for 7 Americans. Also, some research suggests that the 8 for rising rates of mortality, mental-health problems, and addiction 9 poorly-educated, middle-aged people is a shortage of well-paid jobs. Another study shows that people are often happier at work than in their free time. Perhaps this is why many 10 about the agonizing dullness of a jobless future.

But it doesn't 11 follow from findings like these that a world without work would be filled with malaise. Such visions are based on the 12 of being unemployed in a society built on the concept of employment. In the 13 of work, a society designed with other ends in mind could 14 strikingly different circumstances for the future of labor and leisure. Today, the 15 of work may be a bit overblown. "Many jobs are boring, degrading, unhealthy, and a squandering of human potential," says John Danaher, a lecturer at the National University of Ireland in Galway who has written about a world without work. "Global surveys find that the vast majority of people are unhappy at work."

These days, because leisure time is relatively 16 for most workers, people use their free time to counterbalance the intellectual and emotional 17 of their jobs. "When I come home

from a hard day's work, I often feel 18," Danaher says, adding, "In a world in which I don't have to work, I might feel rather different" —perhaps different enough to throw himself 19 a hobby or a passion project with the intensity usually reserved for 20 matters.

| 18. [A]ignored | [B] tired | [C] confused | [D]starved |
| 19. [A]off | [B] against | [C] behind | [D] into |
| 20. [A]technological | [B] professional | [C] educational | [D] interpersonal |

答案：完型填空原文：

People have speculated for centuries about a future without work, and today is no different, with academics, writers, and activists once again warning that technology is replacing human workers. Some imagine that the coming work-free world will be defined by inequality: A few wealthy people will own all the capital, and the masses will struggle in an impoverished wasteland.

A different, less paranoid, and not mutually exclusive prediction holds that the future will be a wasteland of a different sort, one characterized by purposelessness: Without jobs to give their lives meaning, people will simply become lazy and depressed. Indeed, today's unemployed don't seem to be having a great time. One Gallup poll found that 20 percent of Americans who have been unemployed for at least a year report having depression, double the rate for working Americans. Also, some research suggests that the explanation for rising rates of mortality, mental-health problems, and addiction among poorly-educated, middle-aged people is a shortage of well-paid jobs. Another study shows that people are often happier at work than in their free time. Perhaps this is why many worry about the agonizing dullness of a jobless future.

But it doesn't necessarily follow from findings like these that a world without work would be filled with malaise. Such visions are based on the downsides of being unemployed in a society built

on the concept of employment. In the absence of work, a society designed with other ends in mind could yield strikingly different circumstances for the future

of labor and leisure. Today, the virtue of work may be a bit overblown. “Many jobs are boring, degrading, unhealthy, and a squandering of human potential,” says John Danaher, a lecturer at the National University of Ireland in Galway who has written about a world without work. “Global surveys find that the vast majority of people are unhappy at work.”

These days, because leisure time is relatively scarce for most workers, people use their free time to counterbalance the intellectual and emotional demands of their jobs. “When I come home from a hard day’s work, I often feel tired,” Danaher says, adding, “In a world in which I don’t have to work, I might feel rather different”—perhaps different enough to throw himself into a hobby or a passion project with the intensity usually reserved for professional matters.

Section II Reading Comprehension

Part A

Directions: Read the following four passages. Answer the questions below each passage by choosing A, B, C or D. Mark your answers on ANSWER SHEET 1. (40 points)

Text 1

Every Saturday morning at 9 am, more than 50,000 runners set off to run 5km around their local park. The Parkrun Phenomenon began with a dozen friends and has inspired 400 events in the UK and more abroad. Events are free, staffed by thousands of volunteers. Runners range from four years old to grandparents; their times range from Andrew Baddeley’s world record 13 minutes 48 seconds up to an hour.

Parkrun is succeeding where London’s Olympic “legacy” is failing. Ten years ago on Monday, it was announced that the Games of the 30th Olympiad would be in London. Planning documents pledged that the great legacy of the Games would be to lever a nation of sport lovers away from their couches. The population would be fitter, healthier and produce more winners. It has not happened. The number of adults doing weekly sport did rise, by nearly 2 million in the run-up to 2012 – but the general population was growing faster. Worse, the numbers are now falling at an accelerating rate. The opposition claims primary school pupils doing at least two hours of sport a week have nearly halved. Obesity has risen among adults and children. Official retrospections continue as to why London 2012 failed to “inspire a generation.” The success of Parkrun offers answers.

Parkrun is not a race but a time trial: Your only competitor is the clock. The ethos welcomes anybody. There is as much joy over a puffed-out first-timer being clapped over the line as there is about top talent shining. The Olympic bidders, by contrast, wanted to get more people doing sport and to produce more elite athletes. The dual aim was mixed up: The stress on success over taking part was intimidating for newcomers.

Indeed, there is something a little absurd in the state getting involved in the planning of such a fundamentally “grassroots” concept as community sports associations. If there is a role for government, it should really be getting involved in providing common goods – making sure there is

space for playing fields and the money to pave tennis and netball courts, and encouraging the provision of all these activities in schools. But successive governments have presided over selling green spaces, squeezing money from local authorities and declining attention on sport in education. Instead of wordy, worthy strategies, future governments need to do more to provide the conditions for sport to thrive. Or at least not make them worse.

21 According to Paragraph 1, Parkrun has _

- A created many jobs
- B gained great popularity
- C become an official festival
- D strengthened community ties

解析：细节题

定位到原文的第一段，根据第一段里面提到的内容 Events are free, staffed by thousands of volunteers. Runners range from four years old to grandparents; their times range from Andrew Baddeley's world record 13 minutes 48 seconds up to an hour. 可以选择答案为 B

22 The author believes that London's Olympic "legacy" has failed to _

- A boost population growth
- B promote sport participation
- C improve the city's image
- D increase sport hours in schools

解析：细节题

根据题干可以定位到第二段的第一句到第三句，答案选择 B

23 Parkrun is different from Olympics games in that it _

- A aims at discovering talents
- B focus on mass competition
- C does not attract first-timers
- D does not emphasize elitism

解析：细节题

根据题干，可以定位到第三段 "The Olympic bidders, by contrast, wanted to get more people doing sport and to produce more elite athletes."，可以选择答案 D

24 With regard to mass sports, the author holds that governments should _

- A increase funds for sports clubs
- B supervise local sports associations
- C invest in public sports facilities
- D organize "grassroots" sports event

解析：细节题

根据题干，可以定位到最后一段， "Instead of wordy, worthy strategies, future governments need to do more to provide the conditions for sport to thrive. Or at least not make them worse."

选择答案 C

25 The author's attitude to what UK governments have done for sports is _

- A critical
- B tolerant
- C uncertain
- D sympathetic

解析：态度题

根据 UK 等可以定位到原文最后一段的第一句话, Indeed, there is something a little absurd in the state getting involved in the planning of such a fundamentally “grassroots” concept as community sports associations. 选择答案 A

Text 2

With so much focus on children's use of screens, it's easy for parents to forget about their own screen use “tech is designed to really suck you in,” says Jenny Radesky in her study of digital play, “and digital products are there to promote maximal engagement. It makes it hard to disengage, and leads to a lot of bleed-over into the family routine.”

Radesky has studied the use of mobile phones and tablets at mealtimes by giving mother-child pairs a food-testing exercise. She found that mothers who used devices during the exercise started 20 per cent fewer verbal and 39 per cent fewer nonverbal interactions with their children. During a separate observation, she saw that phones became a source of tension in the family. Parents would be looking at their emails while the children would be making excited bids for their attention.

Infants are wired to look at parents' faces to try to understand their world, and if those faces are blank and unresponsive—as they often are when absorbed in a device—it can be extremely disconcerting for the children. Radesky cites the “still face experiment” devised by developmental psychologist Ed Tronick in the 1970s.

In it, a mother is asked to interact with her child in a normal way before putting on a blank expression and not giving them any visual social feedback: The child becomes increasingly distressed as she tries to capture her mother's attention. “Parents don't have to be exquisitely present at all times, but there needs to be a balance and parents need to be responsive and sensitive to a child's verbal or nonverbal expressions of an emotional need,” says Radesky.

On the other hand, Tronick himself is concerned that the worries about kids' use of screens are born out of an “oppressive ideology that demands that parents should always be interacting” with their children: “It's based on a somewhat fantasised, very white, very upper-middle-class ideology that says if you're failing to expose your child to 30,000 words you are neglecting them.” Tronick believes that just because a child isn't learning from the screen doesn't mean there's no value to it—particularly if it gives parents time to have a shower, do housework or simply have a break from their child. Parents, he says, can get a lot out of using their devices to speak to a friend or get some work out of the way.

This can make them feel happier, which lets them be more available to their child the rest of the time.

26. According to Jenny Radesky, digital products are designed to

- [A] absorb user attention
- [B] increase work efficiency
- [C] simplify routine matters
- [D] better interpersonal relations

解析：细节题

根据题干部分的 **digital products** 可以定位到原文的第一段，“**digital products are there to promote maximal engagement. It makes it hard to disengage, and leads to a lot of bleed-over into the family routine.**” 可以选择答案为 A

27. Radesky's food-testing exercise shows that mothers' use of devices

- [A] takes away babies' appetite
- [B] distract children's attention
- [C] reduces mother-child communication
- [D] slows down babies' verbal development

解析：细节题

根据题干，可以定位到原文第二段第一句和第二句“**Radesky has studied the use of mobile phones and tablets at mealtimes by giving mother-child pairs a food-testing exercise. She found that mothers who used devices during the exercise started 20 per cent fewer verbal and 39 per cent fewer nonverbal interactions with their children.**”，可以选择答案为 C

28. Radesky cites the “still face experiment” to show that---

- [A] it is easy for children to get used to blank expressions
- [B] parents need to respond to children's emotional need
- [C] verbal expressions are unnecessary for emotional exchange
- [D] children are insensitive to changes in their parents' mood

解析：细节题

根据题干 “still face experiment” 可以定位到第三段 “**Radesky cites the “still face experiment” devised by developmental psychologist Ed Tronick in the 1970s. In it, a mother is asked to interact with her child in a normal way before putting on a blank expression and not giving them any visual social feedback: The child becomes increasingly distressed as she tries to capture her mother's attention.**” 可以选择答案 B

29. The oppressive ideology mentioned by Tronick requires parents to

- [A] protect kids from exposure to wild fantasies
- [B] teach their kids at least 30,000 words a year
- [C] remain concerned about kids' use of screens

[D] ensure constant interaction with their children

解析：细节题

根据题干“the oppressive ideology by Tronick”可以定位到最后一段“Tronick himself is concerned that the worries about kids’ use of screens are born out of an “oppressive ideology that demands that parents should always be interacting” with their children” 可以选择答案为 D

30. According to Tronick, kids’ use of screens may---

[A] make their parents more creative

[B] give their parents some free time

[C] help them with their homework

[D] help them become more attentive

解析：细节题

根据题干 kids’ use of screens 可以定位到最后一段“Tronick believes that just because a child isn’ t learning from the screen doesn’ t mean there’ s no value to it-particularly if it gives parents time to have a shower, do housework or simply have a break from their child.” 可以选择答案为 B

Text 3

Today, widespread social pressure to immediately go to college in conjunction with increasingly high expectations in a fast-moving world often causes students to completely overlook the possibility of taking a gap year. After all, if everyone you know is going to college in the fall, it seems silly to stay back a year, doesn’t it? And after going to school for 12 years, it doesn’t feel natural to spend a year doing something that isn’t academic.

But while this may be true, it’s not a good enough reason to condemn gap years. There’s always a constant fear of falling behind everyone else on the socially perpetuated “race to the finish line”, whether that be toward graduate school, medical school or a lucrative career. But despite common misconceptions, a gap year does not hinder the success of academic pursuits – in fact, it probably enhances it.

Studies from the United States and Australia show that students who take a gap year are generally better prepared for and perform better in college than those who do not. Rather than pulling students back, a gap year pushes them ahead by preparing them for independence, new responsibilities and environmental changes – all things that first-year students often struggle with the most. Gap year experiences can lessen the blow when it comes to adjusting to college and being thrown into a brand new environment, making it easier to focus on academics and activities rather than acclimation blunders.

If you’re not convinced of the inherent value in taking a year off to explore interests, then consider its financial impact on future academic choice. According to the National Center for Education Statistics, nearly 80 percent of college students end up changing their majors at least once. This isn’t surprising, considering the basic mandatory high school curriculum leaves students with a poor understanding of the themselves listing one major on their college applications, but switching

to another after taking college classes. It's not necessarily a bad thing, but depending on the school, it can be costly to make up credits after switching too late in the game. At Boston College, for example, you would have to complete an extra year were you to switch to the nursing school from another department. Taking a gap year to figure things out initially can help prevent stress and save money later on.

31. One of the reasons for high-school graduates not taking a gap year is that _____.

- [A] they think it academically misleading
- [B] they have a lot of fun to expect in college
- [C] it feels strange to do differently from others
- [D] it seems worthless to take off-campus courses

解析：细节题

根据题干定位到文章第一段第一句：Today, widespread social pressure to immediately go to college in conjunction with increasingly high expectations in a fast-moving world often causes students to completely overlook the possibility of taking a gap year. 所以选 A。

32. Studies from the US and Australia imply that taking a gap year helps _____.

- [A] keep students from being unrealistic
- [B] lower risks in choosing careers
- [C] ease freshmen's financial burdens
- [D] relieve freshmen of pressures

解析：细节题

根据题干定位到第三段第一句：Studies from the United States and Australia show that students who take a gap year are generally better prepared for and perform better in college than those who do not. 所以选 D

33. The word "acclimation" (Line 8, Para. 3) is closest in meaning to _____.

- [A] adaptation
- [B] application
- [C] motivation
- [D] competition

解析：词义题

根据题干定位到第三段最后一句话：Gap year experiences can lessen the blow when it comes to adjusting to college and being thrown into a brand new environment, making it easier to focus on academics and activities rather than acclimation blunders. acclimation blunders. 表示选择错误，所以选 A。

34. A gap year may save money for students by helping them _____.

- [A] avoid academic failures
- [B] establish long-term goals
- [C] switch to another college
- [D] decide on the right major

解析：细节题

根据题干定位在第四段第一句 If you're not convinced of the inherent value in taking a year off to explore interests, then consider its financial impact on future academic choice. 所以选 D

35. The most suitable title for this text would be _____.

[A] In Favor the GAP Year

[B] The ABCs of the GCP Year

[C] The GCP Year Comes Back

[D] The GCP Year: A Dilemma

解析：主旨题

文章第一段开始引出 gap year,从第二段开始到文章结束都在讲述 gap year的优点,A 选项 支持 GAP year 符合全文内容。

Text 4

Though often viewed as a problem for western states, the growing frequency of wildfires is a national concern because of its impact on federal tax dollars, says Professor Max Moritz, a specialist in fire ecology and management.

In 2015, the US Forest Service for the first time spent more than half of its \$5.5 billion annual budget fighting fires-nearly double the percentage it spent on such efforts 20 years ago. In effect, fewer federal funds today are going towards the agency's other work-such as forest conservation, watershed and cultural resources management, and infrastructure upkeep-that affect the lives of all Americans.

Another nationwide concern is whether public funds from other agencies are going into construction in fire-prone districts. As Moritz puts it, how often are federal dollars building homes that are likely to be lost to a wildfire?

"It's already a huge problem from a public expenditure perspective for the whole country," he says. "We need to take a magnifying glass to that. Like, 'Wait a minute, is this OK?' Do we want instead to redirect those funds to concentrate on lower-hazard parts of the landscape?"

Such a view would require a corresponding shift in the way US society today views fire, research hers say.

For one thing, conversations about wildfires need to be more inclusive. Over the past decade, the focus has been on climate change-how the warming of the Earth from greenhouse gases is leading to conditions that worsen fires.

While climate is a key element, Moritz says, it shouldn't come at the expense of the rest of the equation.

"The human systems and the landscapes we live on are linked, and the interactions go both ways," he says. Failing to recognize that, he notes, leads to "an overly simplified view of what the solutions might be. Our perception of the problem and of what the solution is becomes very limited."

At the same time, people continue to treat fire as an event that needs to be wholly controlled and unleashed only out of necessity, says Professor Balch at the University of Colorado.

But acknowledging fire's inevitable presence in human life is an attitude crucial to developing the laws, policies, and practices that make it as safe as possible, she says.

"We've disconnected ourselves from living with fire," Balch says. "It is really important to understand and try and tease out what is the human connection with fire today."

36 More frequent wildfires have become a national concern because in 2015 they _____

- A. Exhausted unprecedented management efforts
- B. Consumed a record-high percentage of budget
- C. Severely damaged the ecology of western states
- D. Caused a huge rise of infrastructure expenditure

解析：原因细节题

根据题干部分的 2015 部分，可以定位到原文的第二段第一句话”

In 2015, the US Forest Service for the first time spent more than half of its \$5.5 billion annual budget fighting fires-nearly double the percentage it spent on such efforts 20years ago.” 可以选择答案为 B

37 Moritz calls for the use of “a magnifying glass” to_____

- A.raise more funds for fire-prone areas
- B.avoid the redirection of federal money
- C.find wildfire-free parts of the landscape
- D.Guarantee safer spending of public funds

解析：细节题

根据题干部分出现的” a magnifying glass” 可以定位到第四段第二句”

We need to take a magnifying glass to that. Like, ‘ Wait a minute, is this OK?’ Do we want instead to redirect those funds to concentrate on lower-hazard parts of the landscape? 可以选择答案为 A

38 While admitting that climate is a key element, Moritz notes that_____

- A.public debates have not settled yet
- B.fire-fighting conditions are improving
- C.Other factors should not be overlooked
- D.A shift in the view of fire has taken place

解析：细节题

根据题干” admitting that climate is a key element, Moritz” 可以定位到第 6 段 ”

While climate is a key element, Morlitz says, it shouldn’ t come at the expense of the rest of the equation.” ,可以选择答案为 C

39 The overly simplified view Moritz mentions is a result of failing to _____

- A.Discover the fundamental makeup of nature
- B.Explore the mechanism of the human systems
- C.Maximize the role of landscape in human life
- D.Understand the interrelations of man and nature

解析：细节题

根据题干可以定位到倒数第二段，开头位置”

Failing to recognize that, he notes, leads to” an overly simplified view of what the solutions might be.” ,以及” It is really important to understand and try and tease out what is the human

connection with fire today” 结合两句话，可以选择答案为 D

40 Professor Balch points out that fire is something man should_____

- A.do away with
- B.Come to terms with
- C.Pay a price for
- D.Keep away from

解析：细节题，根据题干部分的Professor Balch 可以定位到倒数第二段，根据At the same time, people continue to treat fire as an event that needs to be wholly controlled and unleashed only out of necessity, says Professor Balch at the University of Colorado.

But acknowledging fire’s inevitable presence in human life is an attitude crucial to developing the laws, policies, and practices that make it as safe as possible, she says.” 可以选择，答案为 B

Part B

Directions: You are going to read an article, then decide to match the sentences from A, B, C, D, E, F, G. with the first five parts of a sentence. There are two extra choices left. Mark your answers on ANSWER SHEET 1. (10 points)

The decline in American manufacturing is a common refrain,particularly ,from Donald Trump “We don’t make anything anymore” he told Fox News,While defending his own made-in-Mexico clothing line.

Without question, manufacturing has taken a significant hit during recent decades,and further trade deals raise questions about whether new shocks could hit manufacturing.

But there is also a different way to look at the data.

Across the country.factory owners are now grappling with a new challenge: Instead of having too many workers, they may end up with too few,Despite trade competition and outsourcing. American manufacturing still needs to replace tens of thousands of retiring boomers every year. Millennials may not be that interested in taking their place. Other industries are recruiting them with similar or better pay.

For factory owners, it all adds up to stiff competition for workers-and upward pressure on wages.“They’er harder to find and they have job offers,”says Jay Dunwell, president of wolverine Coil spring, a family-owned firm. “They” may be coming[into the workforce],but they’ve been plucked by other industries that are also doing as well as manufacturing.” Mr.Dunwell has begun bringing high school juniors to the factory so they can get exposed to its culture.

At RoMan Manufacturing, a maker of electrical transformers and welding equipment that his father co-founded in 1980, Robert Roth keeps a close eye on the age of his nearly 200 workers.Five are retiring this year. Mr Roth has three community-college students enrolled in a work-placement program,with a starting wage of \$13 an hour that rises to \$17 after two years.

At a worktable inside the transformer plant, young Jason Stenquist looks flustered by the copper coils he’s trying to assemble and the arrival of two visitors. It’s his first week on the job. Asked about his choice of career, he says at high school he considered medical school before switching to electrical engineering.”I love working with tools. I love creating,”he says.

But to win over these young workers, manufacturers have to clear another major hurdle: parents, who lived through the worst US economic downturn since the Great Depression, telling them to avoid the factory. Millennials” remember their father and mother both were laid off. They blame it on the manufacturing recession,” says Birgit Klohs, chief executive of The Right Place, a business development agency for western Michigan.

The 2008-09 recession was another blow. And advances in computing and robotics offer new ways for factory owners to increase productivity using fewer workers. “The gap is between the jobs that take no skills and those that require a lot of skill,” says Rob Spohr, a business professor at Montcalm Community College an hour from Grand Rapids. “There’s enough people to fill the jobs at McDonalds and other places where you don’t need to have much skill. It’s that gap in between, and that’s where the problem is.”

When the recovery began, worker shortages first appeared in the high-skilled trades. Electricians, plumbers, and pipe fitters are in in short supply across Michigan and elsewhere; vocational schools and union-run apprenticeships aren’t keeping pace with demand and older tradespeople are leaving the workforce. Now shortages are appearing at the mid-skill levels.

“The gap is between the jobs that take no skills and those that require a lot of skill,” says Rob Spohr, a business professor at Montcalm Community College an hour from Grand Rapids. “There’s enough people to fill the jobs at McDonalds and other places where you don’t need to have much skill. It’s that gap in between, and that’s where the problem is.”

Ms. Parks of Grand Rapids Community College points to another key to luring Millennials into manufacturing: a work/life balance. While their parents were content to work long hours, young people value flexibility. “Overtime is not attractive to this generation. They really want to live their lives,” she says.

	[A]says that he switched to electrical engineering because he loves working tools.
41. Jay Dunwell	[B]points out that there are enough people to fill the jobs that don’ t need skill.
42. Jason Stenquist	[C]points out that US doesn’ t manufacture anything anymore.
43. Birgit Klohs	[D]believes that it is important to keep a close on the age of his workers.
44. Rob Spohr	[D]says that for factory owners, workers are harder to XXX find because of stiff competition.
45. Julie Parks	[E]points out that a work/life balance can XXX young people into manufacturing.
	[G]says that the manufacturing recession is to XXX for the lay- off of the young people’ s parents.

- 41. Jay 答案 E stiff
- 42. Jason 答案 A tools
- 43. Birgit 答案 G blame
- 44. Rob 答案 B skill
- 45. Julie 答案 F attract

Section III Translation

Directions: In this section there is a passage in English. Translate it into Chinese and write your translation on ANSWER SHEET 2. (15 points)

My dream has always been to work somewhere in an area between fashion and publishing. Two years before graduating from secondary school, I took a sewing and design course thinking that I would move on to a fashion design course. However, during that course I realised I was not good enough in this area to compete with other creative personalities in the future, so I decided that it was not the right path for me. Before applying for university I told everyone that I would study journalism, because writing was, and still is one of my favorite activities. But, to be honest, I said it, because I thought that fashion and me together was just a dream -- I knew that no one could imagine me in the fashion industry at all! So I decided to look for some fashion-related courses that included writing. This is when I noticed the course “Fashion Media & Promotion.”

Section IV Writing

Part A

Directions: Suppose you are invited by Professor Williams to give a presentation about Chinese culture to a group of international students. Write a reply to

- 1) accept the invitation, and
- 2) introduce the key points of your presentation.

You should write about 100 words on the ANSWER SHEET.

Do not use your own name. Use “Li Ming” instead.

Do not write your address. (10 points)

Part B

Directions: Write an essay based on the chart below. In your writing, you should

- 1) interpret the chart, and
- 2) give your comments.

You should write about 150 words on the ANSWER SHEET. (15 points)

2013-2015年我国博物馆数量和参观人数
